IEEE ICAS

ICAS, an IEEE Signal Processing Society (SPS) conference, features world-class plenary speeches, distinguished Symposium talks, tutorial, exhibits, oral and poster sessions, and panels. IEEE ICAS conference covers a wide range of topics related to Autonomous Systems including but not limited to communications, forensics and security, bioengineering, image and video processing, radar, machine learning, big data, etc.

Participants

IEEE ICAS attracts students, professors, as well as researchers and engineers from industry. This includes many graduate students nearing the end of their study seeking new opportunities. For companies interested in recruiting students for full-time employment or internships, IEEE ICAS will facilitate the exchange of information where students could hear about various companies and employment opportunities. Roughly 50% of the participants will be from North America, 30% from Asia, 15% from Europe and 5% from Middle East, Oceania and South America.
